Topic: Business leaders need to set the tone on flexible working hours -
Opinions on work flexibility globally are mixed, even more so in the UAE. There is no doubt that working side by side in an office environment can help to encourage collaboration and help to form productive relationships ... but this is not always guaranteed and negative office politics can be counterproductive to the business.

Is the concept of flexible working hours good for business?

Do people really get more done from home?

Does implementing flexible work hours increase productivity, overall engagement, trust, loyalty and happiness?

Cost: Members Dhs 100/- & Guests 150/- per person
